

LDAP Response Codes

Below are the codes that an LDAP query can return.

Result Code Name	Numeric Value
success	0
operationsError	1
protocolError	2
timeLimitExceeded	3
sizeLimitExceeded	4
compareFalse	5
compareTrue	6
authMethodNotSupported	7
strongerAuthRequired	8
referral	10
adminLimitExceeded	11
unavailableCriticalExtension	12
confidentialityRequired	13
saslBindInProgress	14
noSuchAttribute	16
undefinedAttributeType	17
inappropriateMatching	18

Result Code Name	Numeric Value
constraintViolation	19
attributeOrValueExists	20
invalidAttributeSyntax	21
noSuchObject	32
aliasProblem	33
invalidDNSyntax	34
isLeaf	35
aliasDereferencingProblem	36
inappropriateAuthentication	48
invalidCredentials	49
insufficientAccessRights	50
busy	51
unavailable	52
unwillingToPerform	53
loopDetect	54
sortControlMissing	60
offsetRangeError	61
namingViolation	64
objectClassViolation	65

Result Code Name	Numeric Value
notAllowedOnNonLeaf	66
notAllowedOnRDN	67
entryAlreadyExists	68
objectClassModsProhibited	69
resultsTooLarge	70
affectsMultipleDSAs	71
virtualListViewError OR controlError	76
other	80
serverDown	81
localError	82
encodingError	83
decodingError	84
timeout	85
authUnknown	86
filterError	87
userCanceled	88
paramError	89
noMemory	90
connectError	91

Result Code Name	Numeric Value
notSupported	92
controlNotFound	93
noResultsReturned	94
moreResultsToReturn	95
clientLoop	96
referralLimitExceeded	97
invalidResponse	100
ambiguousResponse	101
tlsNotSupported	112
intermediateResponse	113
unknownType	114
canceled	118
noSuchOperation	119
tooLate	120
cannotCancel	121
assertionFailed	122
authorizationDenied	123
e-syncRefreshRequired	4096
noOperation	16654
